PROFESSIONAL SUMMARY

Enthusiastic AWS Cloud & DevOps fresher with hands-on experience in deploying and managing cloud infrastructure. Strong foundation in Linux administration, Docker containerization, Git version control, and CI/CD pipelines. Actively seeking an entry-level opportunity to contribute to cloud automation and DevOps practices in a growth-driven organization.

TECHNICAL SKILLS

- **Cloud (AWS):** EC2, S3, IAM, VPC, CloudWatch, Elastic Load Balancer (basic), Auto Scaling (basic), Security Groups
- **DevOps & CI/CD:** Docker, Jenkins, Git, GitHub
- **Operating Systems:** Linux (Ubuntu), Windows
- **Networking:** TCP/IP basics, DNS, HTTP/HTTPS, Ports
- **Build & Config:** Maven, YAML
- **Scripting:** Shell scripting (basic)

PROJECTS

AWS EC2 Web Server Deployment

Deployed and maintained a web server on AWS EC2

Configured security groups for SSH and HTTP access

Monitored instance performance using CloudWatch

Dockerized Application

Built Docker images using Dockerfile

Ran and managed containers for a sample application

CI/CD Pipeline (Jenkins)

Implemented a basic Jenkins pipeline

Integrated GitHub repository for automated builds

EDUCATION

Bachelor of Technology – Computer Science Engineering (AI & ML) Dr. Samuel George Institute of Engineering	2022 -2026

CERTIFICATIONS

- AWS Cloud Practitioner – In Progress
